## Coming this Fall: Economic Impact Study Survey

The Council is working with the Middle Tennessee State University Business and Economic Research Center (BERC) to conduct a comprehensive study of the health care industry's impact on the region.

This analysis is a follow up to the previous study commissioned by the Council in 2010. The report will examine the impact of the health care industry on business revenue, personal income, employment, office space and other factors. **Please be on the lookout for the online survey this fall and make sure your company participates.**

Results from the economic impact study will be announced in the summer of 2015.
